Video games

Experience

General Assembly

Boston, MA

Web Development Immersive

Jan. 2019 to Current

12 weeks immersive web development boot camp. 500+ hours of learning front and back end technologies and industry best practices.

Makerere University

Kampala, Uganda

Computer Laboratory Technician

Mar. 2016 to Jan. 2018

I worked with a team under the supervision of the network administrator, troubleshooting computer hardware and networks, configuring cisco devices and offering IT support to students among other tasks.

Projects

Photo Jar - Image Hosting Application

I worked with a team to develop a single page image hosting web application using HTML, CSS and JavaScript for the frontend and Node Js , Express and Mongo DB for the backend.

Link: <https://2jar.github.io/photo-jar-client/>

Appointment Scheduler- Full Stack Project

I developed an appointment scheduler web app for the career coaches team of General Assembly. For this application, I developed a backend using ruby, rails and sql and Html, Css and JavaScript for the frontend. I also took advantage of handlebars templating to display responses from the database.

Boston Fast Foods - Capstone Project

I developed a react web application where users can add reviews about fast food restaurants in the Boston area. For this application, I built the backend using ruby on rails.

Link: <https://juliojesse25.github.io/boston-fast-food-client/>

Tic Tac Toe - Web Game Project

I developed a single page app tic tac toe game using HTML, CSS and JavaScript which can be played locally.
